Fig. 44

The diagram illustrates a control system for a mechanical device. The mechanical assembly consists of a base (1) with a vertical rod (2) passing through it. A component (3) is mounted on the rod, and a component (4) is mounted on the base. A component (5) is mounted on the rod above the base. A component (6) is mounted on the base. A component (7) is mounted on the base. A component (8) is a switch. The control circuit includes a 1000 ohm resistor, a switch labeled PA, and a switch labeled 260. A power source is connected to the circuit.
